

5 Guiding Principles for Effective Telco API Monetization

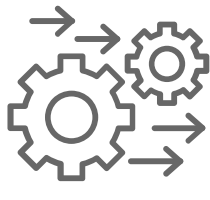

Unleash New Business Models through Innovative API Strategies

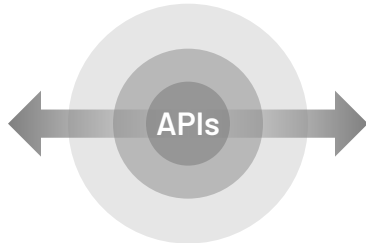

APIs: The new revenue frontier in the telecom landscape

Transformation Comes from Within

Transform your organization with an API-first culture. Learn from cloud giants and integrate APIs deeply into internal processes to drive innovation and efficiency.

Expose APIs for internal services first to accelerate learning before enabling external APIs.

CULTURE EATS STRATEGY.

EMBED API-FIRST THINKING IN EVERY LAYER OF YOUR ORG.

Service-Driven API Design

Design APIs with a focus on enabling services that deliver real value. Work backwards from services to ensure useful and impactful APIs.

Design with the end in mind: Enable services that sell

UNIQUE CUSTOMER DEMANDS

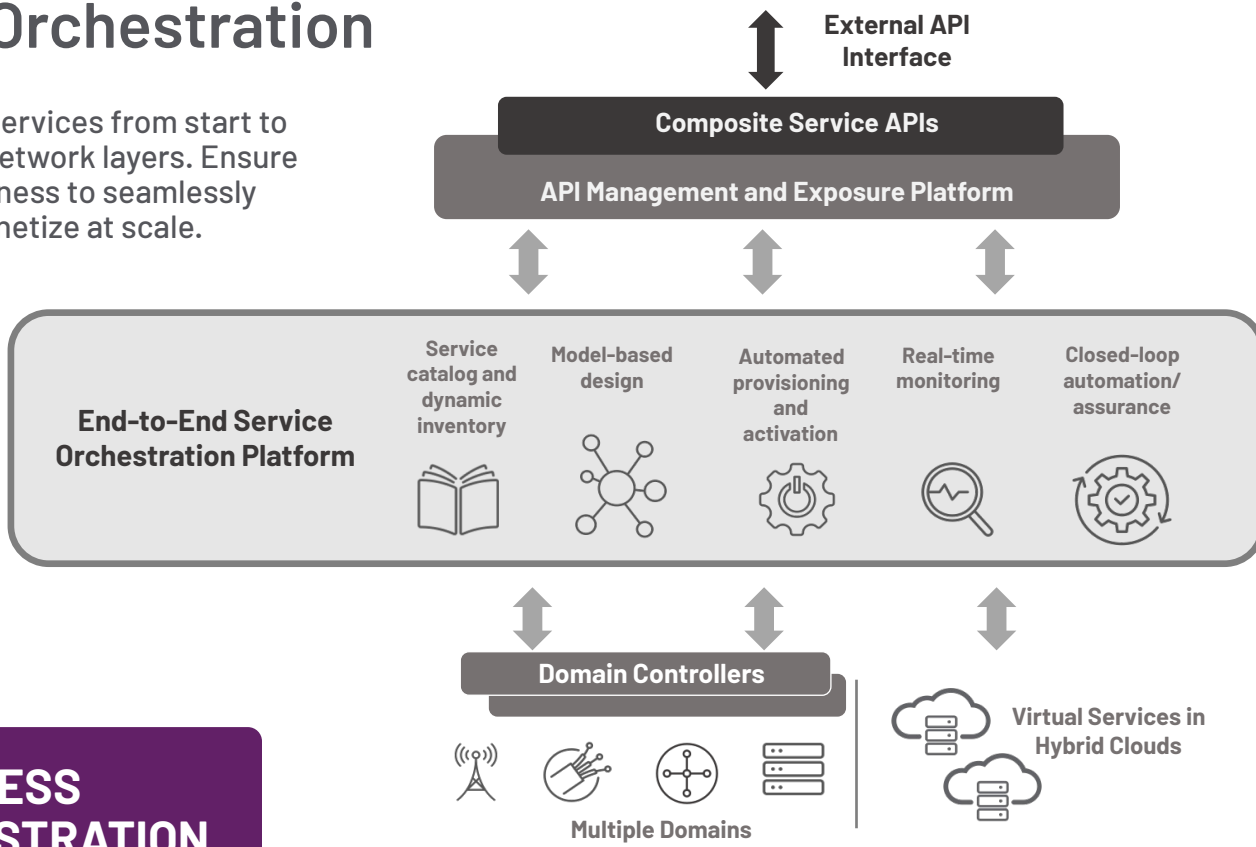

CAMARA PROJECT GSMA OPEN GATEWAY APIS

CUSTOMER-DRIVEN API DESIGN

Enable End-to-End Service Orchestration

Orchestrate API services from start to finish across all network layers. Ensure operational readiness to seamlessly integrate and monetize at scale.

SEAMLESS ORCHESTRATION FOR SEAMLESS EXPERIENCES

Prioritize Monetization

Develop APIs with monetization as a goal from the outset. Manage APIs as you would products. How do they create value? How can you capture that value?

Monetize at every step of the API lifecycle.

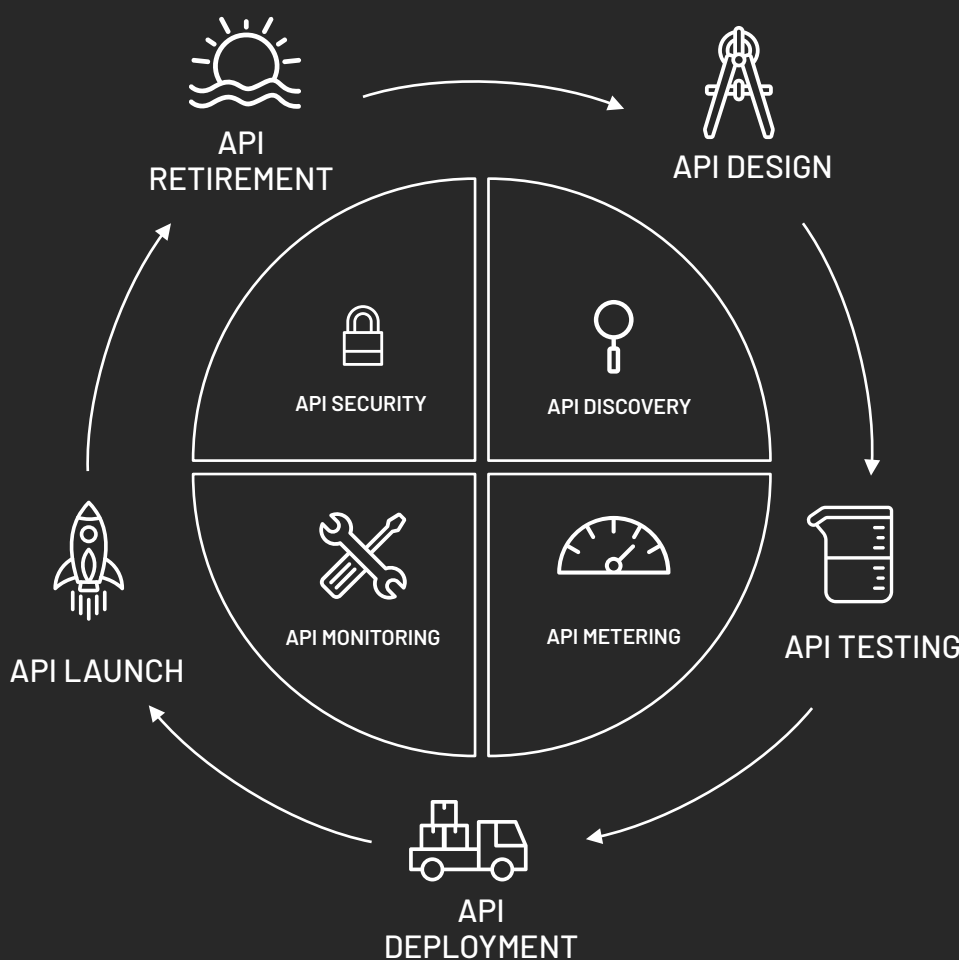

Build platforms providing real-time and fine-grained visibility into pricing, usage, other financial metrics.

Enable flexible configuration layer to build and test bundles and new consumption models.

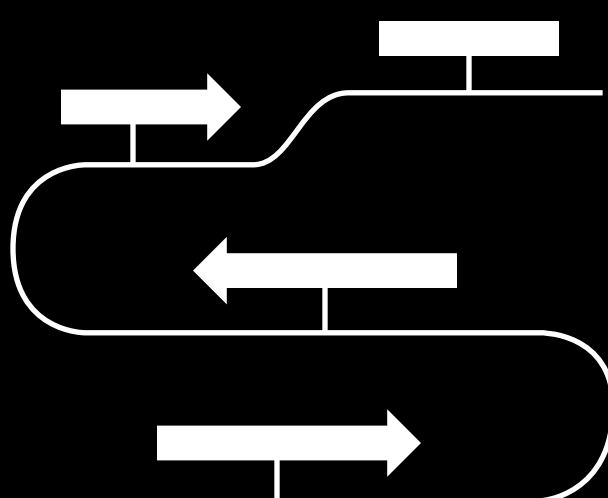

Enhance Developer Experience

Create intuitive, user-friendly APIs that developers love. Provide the tools and support needed to foster innovation and adoption.

Embarking on the API Journey

- Invest in API management capabilities
- Foster business-network collaboration
- Participate in industry initiatives and ecosystems
- Focus on developer relations

Forging Ahead in the API Economy

APIs are driving the future of telecom. Follow the guiding principles above, leverage the power of APIs to build new business models, and lead the market in innovation.
